WHAT I WANT TO GET OUT OF THE NETWORK:

- Learn how similar activities are carried out in other regional ecosystems;
- Learn what tools are used in their activity concerning supporting innovation and technology development;
- Exchange experiences and get inspired;
- Initiate new contacts and development new project opportunities;
- Find fields for future collaboration;

WE ARE THE ORGANIZATION THAT:

- is the one of research and development of Polish mining and environmental area and a center where clean coal technologies are developed;
- provides R&D services targeted for: development of new technologies, optimization of mining and industrial processes, modernization and revitalization of postindustrial area, measurement and analytical services;
- has extensive contacts in industry and legal authorities which gives possibility to perform research projects;
- was responsible for elaboration of implementation model for Technology Development Program, Regional Innovation Strategy of Silesian Voivodship;
- is experienced in participation and coordination in regional, national and international projects, especially financed from EU funds;
