ADDRESS:

Ul. Sowińskiego 5
44-100 Gliwice

WHAT I WANT TO GET OUT OF THE NETWORK:

- Learn from other participants how similar activities are carried out in their regions;
- Exchange experiences and get inspired;
- Initiate new contacts;
- Start up future collaboration;

WE ARE THE ORGANIZATION THAT:

- is the main research and development centre of Polish non-ferrous metals industry;
- conducts complex activities that cover all stages of metallic materials production: from ore treatment to technologies for production of modern product meeting all environmental standards;
- provides R&D services targeted for: development of new technologies, optimization of industrial processes, modernization of production lines, construction of equipment, measurement and analytical services;
- has extensive contacts in industry which gives us a possibility to perform research works not only on laboratory but also on a pilot and industrial scale;
- develops solutions which are implemented in large, medium and small enterprises; not only in non-ferrous industry but also in other branches;
- is experienced in participation in national and international EU projects;
